

**External Email #3**

Dear \_\_\_\_\_,

We care about our residents and the care that's available to them. Every resident has different needs, but ALL of those needs are important to us. All of our residents can get ***The Right Care, Right Here***. This means that your loved one's healthcare needs can be met without having to leave our campus.

*BSA ComPassion Home Care* is a team of highly qualified nurses, therapists, medical social workers, and other medical professionals who are dedicated to putting their patients' needs first. They specialize in providing top notch medical services through a caring and compassionate staff. *BSA ComPassion Home Care* can help organize, manage, and administer medication. They are also there to help make residents' homes as safe as possible and to educate them about their health conditions. When our residents are feeling overwhelmed from major health procedures or are not sure they understand the doctor's orders, *BSA ComPassion Home Care* can step in. They can be there to communicate directly with the physician, assist with insurance, be present at discharge, and help navigate the road to recovery for our residents. It's important to *BSA ComPassion Home Care* that each resident has a health plan that's right for him or her. They work to ensure that residents feel in control, independent, and safe.

We're proud to help provide an improved quality of life with the ***Right Care, Right Here*** to all of our residents. If you have any questions or would like more information about *ComPassion Home Care* available on our campus, you can speak with any Park Central staff member.
